

TAKE FLIGHT 2024

VIRTUAL PARTNERS MEETING

Advancing Western Monarch and
Native Insect Pollinator Conservation

THURSDAY, SEPTEMBER 5, 2024

Collaborative Western Monarch & Native Insect Pollinator Conservation

Amanda Barth

abarh@utah.gov

Utah State University | Utah Division of Wildlife Resources

Amanda has a background in pollination ecology, science education, and community engagement. She is the Rare Insect Conservation Coordinator for Utah and established the state's Rare Insect Conservation Program in 2019, identifying at-risk insect species and developing recommended conservation actions for recovery and listing prevention. Since 2020, she has served as Chair of the Western Monarch & Native Insect Pollinator working group, leading efforts to promote and expand holistic pollinator conservation strategies in Western states through inter-agency and cross-sector partnerships, community outreach, and sound science.
