# Western Pollinator Habitat Prioritization Tool

**Chelsea Sink**

[chelsea\\_sink@fws.gov](mailto:chelsea_sink@fws.gov)  
U.S. Fish and Wildlife Service

Chelsea joined the USFWS Pacific Southwest Region in 2023 as a Geospatial Biologist in the Science Applications Program. She creates publicly accessible geospatial tools to aid in landscape conservation. Before joining the Service, Chelsea interned with Science Applications to advance a database and dashboard for restoration projects across the Western US with benefit to pollinators.

She has worked to expand this into a publicly accessible tool that includes species occurrences and habitat types to further support pollinator conservation and habitat restoration efforts.
