Native Insect Pollinator Conservation

TUESDAY, SEPTEMBER 10, 2024

# Insect Pollinators & the Endangered Species Act

**Jeff Everett**

Jeff\_Everett@fws.gov  
U.S. Fish and Wildlife Service

Jeff has spent most of the last decade at the intersection of bumble bee conservation and the Endangered Species Act. He is the Service's lead biologist for Franklin's bumble bee and Western bumble bee, working on many different aspects of bumble bee conservation from listing to recovery. Based in Portland, Oregon, Jeff is collaborating on a number of regional and national pollinator conservation teams and research projects, including development of eDNA to detect rare species.
