U.S. Department of Agriculture

Dr. Jonathan Berenguer Uhuad Koch is a Research Entomologist leading a research program at the USDA - Agricultural Research Service - Pollinating Insects Research Unit (PIRU) in Logan, Utah. His 15+ years of research have focused on bee biology, ecology, and evolution, and innovative solutions to promote understanding of bees and their diversity. His research program at PIRU works to produce science that informs the sustainable management and conservation of bumble bees in agricultural and wild ecosystems.
