Native Insect Pollinator Conservation

THURSDAY, SEPTEMBER 5, 2024

Western Monarch and Pollinator Conservation

Sarina Jepsen

sarina.jepsen@xerces.org

Xerces Society for Invertebrate Conservation

Sarina has been working on the conservation of imperiled insects for 18 years. She directs the Xerces Society's Endangered Species Program in which she oversees a team of 22 conservation biologists who engage in research, run community science programs, develop technical guidance, restore habitat, and advocate for the protection of imperiled species and their habitats, with efforts primarily focused on the conservation of monarchs and other butterflies, bumble bees and other wild bees, fireflies, and mollusks.
